Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art does not anticipate nor render obvious the claimed subject matter of: a method for carrying out gear shifting in a twin-clutch transmission, comprising; downshifting as a function of at least one predetermined vehicle wheel slip parameter.

No particular single feature of the claim renders the claim as a whole patentable. Only the claim taken as a whole combination is deemed new and unobvious.

Further, the term "twin-clutch transmission" has been interpreted to be limited to those transmissions according to the following paragraph from the specification:

"[0003] Twin-clutch transmissions, especially parallel shift transmissions, are known from automotive technology. A parallel shift transmission (PSG) preferably has two transmission input shafts, each of which is coupled to the engine shaft via a friction clutch."

This paragraph has been interpreted to mean that the claimed twin-clutch transmission must have two input shafts, each of which is coupled to an engine shaft via a friction clutch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
